Calculus Assignments – Q1-Wk1
Please print this assignment sheet out. Attach it to your homework.

Section	Problems to complete	Due Date	Completed And corrected	Problems to review in class
P.1	19-71 every other odd (eoo) 73, 75	8/19		
P2	3 – 69 eoo	8/19		
P3	1 – 63, eoo	8/23		
P4	7, 13, 17	8/23		

Label your assignment with your name, date, and section. Complete your homework in pencil. Leave space between problems so that you can make corrections. An assignment free of errors can hardly be anticipated! Feel free to use the back of your paper.

You must show your work for computational problems. Be sure to have it checked and then make corrections before the due date.

Mark incorrect problems in red. Draw a line through the mistake(s) --Don't just erase them—and then rework the problem in the space you provided.
Be sure to list the problems on this form that you still don't understand and that you would like to see worked out in class.

To receive full credit for your completed assignments (100%), you must complete your work as stated. Include this assignment sheet.

If your assignments are not checked and corrected by the due date, they are late assignments. Late work will be accepted at the next meeting date only (unless you have an excused absence) and will receive 60% credit-- only if it is complete with corrections.
